13

the forehead. Hold the ring at the bottom with your fingers to keep it in place. Remove the magnetic ring and the cloth and put the ring back on to switch to a new red light therapy. Place the electrode massage head on the face and massage from the forehead down the cheeks and up over the forehead.

3. INFECTION

Yellow light improves dark spots & hyperpigmentation while **blue light** kills bacteria and reduces inflammation. Different absorption & cell growth. Negative ions draw the nutrients of your skin cells to the surface. After switching on the device, keep eyes on Off/Intense to select mode 2 and use the red + buttons to select yellow light. Apply 5 to 6 drops Face Yoga oil or serum to your face. Massage with/without the electrode massage head while **Yellow light** is on. The device will automatically switch to blue light over the forehead from the lower jawline over the cheeks and up over the forehead.

4. SMOOTHING

Due to even complexion, fresh glow & contoured facial features EMS stimulates the facial muscles making it micro-currents while red light stimulates collagen production and improves the elasticity of the skin. After mode 1-3 and 3-5 on the device, briefly press On/Off three times to select mode 4 and use the red + buttons to select the correct level. Apply 1 to 3 drops of Face Yoga oil or serum to your face. Place the electrode massage head on your face. This activates the EMS and red light therapy. The device will automatically switch to blue light application. Massage from the lower jawline over the cheeks and up over the forehead.

POWER OFF

To switch off your tool press and hold the power button for about 3 seconds. The device will turn off and the screen will display "OFF".

CLEANING

After each use and at other use, please wipe the electrode with a clean cloth soaked in water and clean the brush with a gentle cleanser.

BATTERY

This tool is powered by a built-in rechargeable lithium polymer battery, which can be properly recharged in 1-2 hours. Please always follow the correct instructions for charging the battery.

When the battery of the product is low, there will be a low voltage alarm: the red LED light will flash and automatically switch off.

When the battery voltage is low connect with the charging cable to connect the LED light. The other end of the power cable. Please use the original charging cable to charge this tool.

The red LED light flashes during the charging process and will continue continuously when the product is fully charged.

A full charge takes about 1.5 hours.
